Consulting Services for phpMyAdmin

Report - October 2022

Overview

Over the month of October 2022 I wrote fixes for 5.2 versions. Merged and reviewed contributor's work. Improved the Metro theme and the UI of old jquery modals.

First week (40)

not working on the project

Second week (41)

I reviewed and merged quite a lot of pull-requests. Also made adjustments of tests. Rebased and tested contributors work.

Third week (42)

I sorted out a lof of old issues, reviewed a lot of pull-requests. Also fixed UI bugs on the old confirm modal about close modals and go/cancel buttons. And fixed bugs on the monitor page.

Fourth week (43)

I started by fixing bugs and made changes to the issue and pull-request workflow and wrote them into a wiki page Merged and reviewed contributions. Changed jquery migrate and validation to the `.min.js` version. I wrote fixes for the multi table query interface. And improved some details on Metro theme. And finally I wrote more bug fixes and changed js.cookie.js to the `.min.js` version.
