Consulting Services for phpMyAdmin

Report - February 2026

Overview

In February I did some server work and merged + reviewed contributions. I also did some issues triage. And I did a lot of work on the error-reporting server.

First week (06)

I merged contributions after reviewing them. I also did some issues triage.

Second week (07)

On the web VM I cleaned up old reports, upgraded the VM to Debian Trixie. And did back our nginx and PHP configs on a repository. And cleaned up old PHP versions left over. Upgrading the server meant that I had to upgrade the website to Django 4.2.

I also did sync the code coverage setup across all repositories and did set the token in GitHub actions secrets.

And upgrading the server meant that the error-reporting-server was broken, so I upgraded it to CakePHP 5.0. The server is now running PHP 7.4.

The phpMyAdmin package on gentoo has more metadata, my pull-request is now merged.

Third week (08)

I fixed the yarn setup on the web VM. And continued to work on the error reporting server as there was a lot of broken and deprecated code to fix and migrate. I merged contributions after reviewing them. I also did some issues triage.

Fourth week (09)

I merged contributions after reviewing them. I also did some issues triage. And worked on some fixes and improvements for the error reporting server.

Commit list

phpmyadmin/phpmyadmin (GitHub)

Week 06

- f3d76f4066 - Merge #19956 - Fix #19749 - Descending index being converted to ascending
- 2e18466133 - Merge #20084 - Improve detectSize
- 891f406482 - Merge #20085 - Fix #20069 - Access CodeMirror through the window object
- 6b1431b6bf - Merge #20086 - Show stylesheets only if CodeMirror is enabled
- e76adf1911 - Merge #20082 - [Toon Export] Fix null separator
- 5f2817071b - Merge #20081 - Fix buffer not closed and toon default indent
- b89ee4e4fc - Merge #19991 - toon export
- 13b2971cd0 - Merge #20046 - Fix checking cookies for auto-saved query
- 63ac9761fa - Merge #20020 - Fix #19987 - Reopening a function removes charset
- f2572c4228 - Merge #20070 - Fix #20065 - event creation when server drops past event
- f26f370f4a - Merge #20073 - Fix display of timestamp after inline edit
- 7e0747f5b6 - Merge #20060 - Fix virtual column collation support for MariaDB
- 05c981b9d6 - Merge #20061 - Set sql mode for sql-parser when connecting to db

Week 07

- 5310c0df9c - Merge #20093 - Unset route - $getParams is never empty
- 992718ff3c - Merge #20036 - Frontend: Allow mouse selection of cells for easier copying
- 50a473c7a1 - fix Undefined array key "lang"

Week 08

- 3f658b8e15 - Merge #20091 - Fix #18773 - Make POST requests for encrypted queries
- 757c804ea0 - Merge #20131 - Fix #18579 - Export geometry and binary fields in all export types
- c6ecfa5a8c - Merge #20132 - Xml import geometry
- bc057eb914 - Merge #20127 - Replace getRealSize with ini_parse_quantity
- 5993dae0e4 - Merge #20117 - Fix #20116 - Make sure fullscreen is enabled
- ac1fbe1c17 - Merge #20080 - Fix # 20068 - Do not html encode triggers or events for ajax requests
- 733bc6bf2f - Merge #19942 - Fix #17285 - Add DELIMITER $$ when exporting triggers

- 0c8a6520cc - Merge #20109 - Fix #18927 - Allow resize of GIS visualization vertically

Week 09

- 8a9d2c14f2 - Merge #20176 - Fix #15116 - Undefined global variable $sql_insert_syntax
- da22ca88f4 - Update baselines
- f40043aeaa - Merge #20196 - Fix #20195 - error when generating charts for columns with int column names
- f5ce85560a - Merge #20162 - Fix #20155 - Fix Call to a member function count() on null
- 02b1e70ef4 - Merge #20164 - Fix CodeMirror.runMode is not a function
- ade39e175e - Merge #20175 - Export geometry and binary fields for TOON
- 304dc60a39 - Fix selenium login test
- ce05a69743 - Ignore some TypeScript "errors" about fullscreen properties
- 5391167eab - Merge #20166 - Fix #20152 - XML import when structure is present
- 18913e8efe - Merge #20172 - Fix Selenium tests
- 9d14719fc2 - Fix uses of static $createDatabase
- 59c349958b - Generate a dynamic matrix of test names for Selenium tests
- 5139170303 - Import test-selenium from the master branch
- 8da964fa40 - Move login to setUp() of parent::
- 16d6380805 - Fix a coding standard warning
- 6f645fbac8 - Merge #20021 - Fix #19998 - stale grid edit state after AJAX table refresh
- e96c516f9a - Update the psalm baseline
- f6c2088e81 - Merge #20119 - Fix #20116 - Check also for WebKit
- 2dad295106 - Merge #20092 - Add warning message if URLQueryEncryptionSecretKey is not valid
- 4c2b4b283e - Merge #20087 - Fix #19843 - Add Refresh button for EXPLAIN queries
- c4a90acddc - Merge #20149 - Show sql-highlight div only if CodeMirror is enabled
- 4bbcd9249b - Merge #20165 - Improve the way phpMyAdmin uses the user-agent
- ff2a983faa - Merge #20163 - Fix #20157 - Set user-agent to null if not defined
- be24e8832c - Merge #20168 - Fix XML test on QA_5_2

phpmyadmin/website (GitHub)

Week 06

- eba86ffb69 - Merge #195 - Correct date in /about/

Week 07

- aa9174c8d6 - Document Debian packages to run the website
- bf2e035af8 - Make libraries links real links
- 01214a3d47 - Make Python 3.14 experimental in the CI
- 480ab87396 - Fetch more commits for Scrutinizer to work
- 2c082513cc - Try to send coverage.xml to Scrutinizer
- a4bd87c34d - Upgrade to Django 4.2 - Add pmasa year alter field
- b04b95c0fc - Bump codecov/codecov-action to v5 and Send coverage to Scrutinizer
- 4bb82e59fd - Fix tests "TypeError: cache_control didn't receive an HttpRequest"
- ba090b589d - Implement 503 reply if the GitHub token says 401
- 1854930df6 - Require mysqlclient as many installations use MySQL anyway
- 7bc2b1a0a6 - Upgrade to Django 4.2
- 67b2b8401c - Bump GitHub actions
- 36b4e03528 - Only test Debian Trixie and Debian Forky Python versions

phpmyadmin/shapefile (GitHub)

Week 07

- baf8471ff3 - Fix report-type to report_type for Codecov
- 41b3d58e90 - Send junit test logs to Codecov
- 6f9d58777c - Upgrade codecov/codecov-action to v5 and fix uploading reports
- 00ed17916f - Support phpunit 13
- 754d6290a8 - Bump GitHub actions
- 27e4df2122 - Add PHP 8.5 to normal CI workflow
- 8ec767d7ef - Add permissions to GitHub workflows
- ed45933a55 - Drop old stalebot config
- dd4f743ea4 - Drop support for phpunit 10, support 11 and 12

phpmyadmin/localized_docs (GitHub)

Week 09

- 0684a09817 - Run apt update before apt install

phpmyadmin/error-reporting-server (GitHub)

Week 07

- 0ce6b894df - Document Caddy configuration
- 0607506998 - Enable migrations and migrate them
- 1ab3bbc1bb - Update the PHP version on the README + fpm
- 0e06aea006 - Sync files with the example cake app
- d7f76d6417 - Fix cake commands should have a name native type hint
- 4353c8a0ae - Update the phpstan level to 7 vs max and update the baseline
- 143380c0c7 - Make DebugKit optional
- 70ca00307e - Fix loadModel was removed and fix redirect should be used with a return
- bbc61c6132 - Upgrade to Cake 5.0
- 2ee2bdfabb - Require PHP 8.4
- 439f711edb - Upgrade to Cake 4.6
- 3c7b17c09d - Run Scrutinizer on PHP 7.4
- c38fb65096 - Bump GitHub actions and restrict to PHP 8.4

Week 08

- da161f1311 - Add the CSRF token to <form fields
- 169d527b09 - Fix phpstan detected errors
- 51c6b6880d - Use the token from the user to access org membership
- 194474e30b - Improve logging of 401 errors
- db68d50b70 - Trim the error_message if it is too long
- 57392c91fe - Expose current_developer to templates
- e452f05a13 - Improve and fix the logic of the auth middleware
- 7f3407fbf8 - Remove notifications from allow read only
- 84a404d605 - Fix tests about read_only in the session
- df83038b52 - Destroy the session when the user calls login
- 69d449401f - Assert empty responses for dev * routes
- bbb2973f5a - Improve auth middleware logic
- 064d35e639 - Developers login should return a Response
- a5d01e67ad - Add missing assert response code to tests
- 3326c006dc - Remove recursive flag as it does not exist anymore
- 80d8dce6cd - Fixup the logic of the auth checking
- 4e95847001 - Fix another deprecated findAll
- 05c4f889f8 - Fix missing property on events
- da4da080a2 - Fix developers controller test missing assertions or read_only
- 870c5cbdb2 - Add missing read_only to incidents controller test and fix asserting response code
- e717f3f058 - Disable CSRF check on the GitHub events route
- 2d315efcb8 - Add missing read_only to the session for reports controller test
- 9a2018606c - Block access to notifications according to the test
- f0c1e7399f - Fix notifications controller test
- 3e430bb854 - Fix reports controller test
- d95f8c5717 - Fix more deprecated fetchAll in ReportsController
- 6ab01398b7 - Un mock sync github tests for curl calls, now use the client
- 284051e425 - Un mock developer tests for curl calls, now use the client
- 9ec1425ae8 - Fix two more deprecated fetchAll
- bd81a04434 - Do not try to install the local example if we do not have one
- 5fbb8c5ec9 - Replace cURL with the Cake Http client and fix tests with Cake Client response mocks
- af500854e8 - Fix current_developer is not set in tests
- 6a7d3bd285 - Add back query select alias
- d194fdcc5e - Migrate commands to the new format
- 8c29f72c55 - Sync Installer with the example cake app
- 61dc7e748a - tests: migrate to getFixtures and use class names + fix missing parent::setUp()
- 351532337a - Move the security check code into a middleware
- 1fa421c6e5 - Ignore app_local.php
- 3dca79d9ce - tests: improve incidents test
- af26d5c2eb - Improve Incidents creation

- e8cb0bf357 - Improve uses of cURL
- 64ef84584c - Fix $current_developer can be null
- b25acd961b - Update the coding standard by using the one of phpMyAdmin 6.x as a template
- d494086505 - Make phpcs file paths relative in reports
- 92e28bd24c - Drop not used response to creating an incident
- bdf825796f - Disable CSRF on the /incidents/create route
- dad500109e - Fix fetchAll deprecations
- 4f1fdd3700 - Add back constant BASE_DIR
- 74c8ae0a48 - Fix related_reports do not pass a builder, pass results
- 3d4bba5ade - Update the phpstan baseline
- f52f639575 - Fix missing $id on ReportsTable and fix findAll
- ba1ebda36e - Fix more deprecations in tests, use attributes for phpunit. Enable one commented test
- 46ff8a9bb5 - Fix deprecations findAll wants named params
- e5fe320be5 - Fix SQL syntax order needs to be a single string
- 63635ede41 - Fix "Cache config _cake_core_ is deprecated. Use _cake_translations_ instead"
- b7aa982d23 - Improve the GitHub API class, always print the HTTP code
- 10d57dc6bb - Fix bugs and missing RequestHandler class
- a04c6054fc - Remove deprecated curl_close
- 9ac5fcc548 - Fix deprecations for tests and sync bootstrap with the example app
- 65c3978c76 - Fix deprecated concats
- 8e85cd6ead - Make normal files non executable
- ad2a4ad308 - Fix file mods of bin/ to 775
- f5eba4787f - Update the phpstan baseline
- 159dc3871d - Apply coding standard fixes
- 56447c9a1e - Fix loading forwarding and oauth configs

Week 09

- c51d103430 - Disable forwarding in the example
- 2164997525 - Baseline phpstan detected errors
- 43f8ddc104 - Add a test case for a null user agent
- b2c531cfd8 - Do not try to do the salt if the app_local.php file does not exist
- f9796eb128 - Fix the logic behind copying the example

gentoo/gentoo (GitHub)

Week 07

- 6d26920da7 - dev-db/phpmyadmin: update the description
- 295d205398 - dev-db/phpmyadmin: add more upstream attributes

phpmyadmin-team/mariadb-mysql-kbs (GitLab)

Week 06

- dd0cecb2ba - Send 1.3.0-3 to unstable

Handled issues

phpmyadmin/phpmyadmin (GitHub)

Week 06

- 20050 - [Bug]: Cannot access user management when connection and server collation differs
- 20074 - [Bug]: "%s" in the dialog when delete user
- 20078 - [Feat]: rename setup.html to install.html
- 19876 - 2054: The server requested authentication method unknown to the client `auth_gssapi_client`
- 18156 - Columns are disappearing when reordering them
- 19924 - phpMyAdmin's Demo Website is out of space
- 20069 - [6.0]: Uncaught ReferenceError: CodeMirror is not defined
- 19600 - columns display dropdown not showing
- 19366 - 2FA Setup Across Multiple phpMyAdmin Endpoints
- 19610 - Support Descending Indexes

Week 07

- 20065 - [Bug]: ErrorException: Undefined array key 0 when an event is created in the past
- 19749 - [Bug]: Descending index is converted to ascending if edited
- 17362 - Change collation for VIRTUAL column

- 19987 - [Bug]: Reopening a function removes charset
- 20072 - [Bug]: Inline-editing timestamp value is removing value in ui after
- 18853 - PMA Non-Responsive to User Input - Cleared with a Page Reload

Week 08

- 20114 - [Bug]: Wrong collation setting disables user management
- 18170 - Uncaught TypeError: window.makeGrid is not a function
- 19661 - [Bug]: Clicking the Export tab results in error on Windows Server 2019 and IIS 10.0
- 18927 - Allow resizing vertically for GIS Visualization
- 20068 - [6.0]: Exported event contains html entities
- 20118 - [Bug]: ErrorException: Undefined global variable $sql_insert_syntax
- 17285 - Exported Triggers not usable for import again
- 20116 - [Bug]: TypeError: Fullscreen request denied
- 19865 - [Bug]: `X-ob_mode` header should use hyphens
- 19644 - Uncaught TypeError: can't access property "success", data is undefined
- 20133 - [Bug]: ErrorException: Undefined array key 0

Week 09

- 18579 - Blob columns aren't exported in PDF
- 19998 - [Bug]: Last bad query is remembered and tries to execute it again
- 20152 - [6.0]: XML import fails when table has data
- 20155 - [Bug]: Error: Call to a member function count() on null
- 20157 - [Bug]: ErrorException: Undefined array key "HTTP_USER_AGENT"
- 18928 - Search function - when no datasets are found no sql-statement is provided

phpmyadmin/error-reporting-server (GitHub)

Week 08

- 190 - Cannot log in to https://reports.phpmyadmin.net/incidents
