Consulting Services for phpMyAdmin

Report - March 2026

Overview

In March I merged and reviewed a lot of contributions, did some issues triage, kept up with the Debian packaging of our dependencies, and reworked the website.

First week (10)

I merged contributions after reviewing them. I also did some issues triage. I updated the psalm and phpstan baselines, and cleaned up the release process (the release script, the list of files excluded from a tarball, and removing leftover vendor dev files). I also adjusted the GIS test and the coding standard.

On the packaging side, I uploaded tcpdf 6.11.0 and 6.11.2 to unstable, and bumped the copyright years for mariadb-mysql-kbs.

Second week (11)

A quieter week. I added a SQL button to the database list.

Third week (12)

I merged contributions after reviewing them. I also did some issues triage. I fixed several XML import problems and refactored how the default storage engine is retrieved, refactored the File class, and did the QA_5_2 backports along with a PHPStan update.

On the website I reworked the sponsors (moved them into a data file, handled plurals and rel attributes), dropped planet.phpmyadmin.net, improved the CDN error handling and updated the layout with colour modes and the removal of jQuery.

I also updated the CI PHP versions on shapefile.

Fourth week (13)

I merged contributions after reviewing them. I also did some issues triage. And I sent mariadb-mysql-kbs 1.3.0-4 to unstable.

Commit list

phpmyadmin/phpmyadmin (GitHub)

Week 10

- 3d0e40a9fb - Merge #20223 - Fix #17451 - fetchValue call with connection parameter
- 0055ec0054 - Merge #20217 - Fix #19330 - Show original value instead of negative value
- 2f4a40d208 - Merge #20216 - Fix #20140 - Fix data.responseJSON is undefined
- a34bb65806 - Update the gis test & coding standard
- 1cb42fd2cc - Update the psalm baseline
- 885da3d701 - Cleanup remove vendor dev files
- 20f708999a - Merge #20215 - Fix #20174 - Bump tracekit version from 0.4.7 to 0.4.9
- ca0510b0c6 - Cleanup the list of vendor files to remove
- 66df368053 - Exclude one dev file from the release
- 9cf2981078 - Fix typos in create-release.sh
- 2c33c5d13d - Update the list of release excludes
- 0fdf541cb6 - Merge #20199 - Fix #18303 - Fix indexDialogPreviewModal is null
- 8c2ccd642a - Merge #20200 - Fix #20139 - Fix data is undefined
- 933e5be2ef - Merge #20201 - Fix #20141 - Fix data is undefined
- 333493be35 - Merge #20203 - Fix #20142 - Unregister all click events when the modal is hidden
- 2b45d9c284 - Merge #20209 - Don't show invalid Gis download options

Week 11

- 4265b512e6 - Add a SQL button to the database list

Week 12

- d6ca244a18 - Merge #20214 - Fix #20134 - Undefined array key 0 when there are no statements
- 86db8ab58c - Merge #20161 - Fix #20102 - Show grid edit hint for truncated values
- 7c502c3b40 - Merge #20242 - Fix ImportXML existence check
- a46e3f55ca - Fix tests after #20227 - for the default storage engine

- e454326296 - Update the phpstan and psalm baseline
- 6f66b76c5d - Merge #20105 - Fix #19891 - invalid `$cfg['Export']['format']` or `$cfg['Import']['format']` defaulting to `sql` in dropdown
- ba3cfc7eb4 - Merge #20154 - Fix gis export to pdf and svg
- 1b0b27fc2b - Remove properties_num_columns from templates, not needed after #20227
- f3363a3f43 - Merge #20227 - Fix #20171 - Refactor default engine retrieval logic
- 41a223641f - Merge #20241 - Add required referrer when loading tiles from openstreetmap.org
- 61c5aed763 - Merge #20170 - Fix #20153: Handle missing database tag in XML import
- ef79edfdac - Assert SQL queries for import XML
- 94a9d2f272 - Fix "ImportXml::doImport(): Node no longer exists" when importing XML with no database
- a59be33d71 - Backport XML tests for no database (#20153) and improve GIS test
- 7985b04f2d - Fix XML tests for importing GIS and no DB XML (#20153)
- 1e3d6b5c0c - Merge 'QA_5_2'
- 13d1c90d44 - Merge #20185 - Refactor the File class
- 63f642dd02 - Merge #20126 - Fix #20121 - Find and Replace
- 8b2a2c41dc - Merge #20144 - Add sql highlighting for Show create
- bd24c09baf - Merge #20184 - Improve the description of ShowDatabasesNavigationAsTree in the documentation
- cda01ff436 - Merge #20188 - Fix: Text copying while editing a cell
- bf7e0c3d85 - Merge #20213 - Improve design in structure snapshot page
- 5a8ddf18c2 - Merge #20237 - Gis ScaleData offsets in target coordinate system
- 8ae46b07fa - Merge #20239 - Update PHPStan

Week 13

- 4246b6d9a4 - Merge #20260 - Fix #20181 - allow selecting text fragments in cells

phpmyadmin/website (GitHub)

Week 12

- 1dee475192 - Replace broken link for PAD in about website
- 9ef6d2c91f - Fix broken awards link
- de6bbc71dd - Merge #186 - Update layout: Color modes, jQuery removal, and more
- 449779eedc - Replace checksum by shasum for packages.json for composer
- 2262bf3f86 - Remove rel quick-download and add the download attribute to download buttons
- 0a4bcd804a - Remove css call for font-awesome
- d86688eb32 - Add back mising sponsor and implement skip from sponsors page
- e8bd19bd16 - Handle rel= for sponsors too
- 37e7cddfc9 - Handle plurals for Sponsor titles
- 6dcd444a19 - Move sponsors from `pmaweb/templates/sponsors.html` to `data/sponsors.py`
- d0c9344189 - Improve cdn to handle HTTP errors
- e35a7c8ef7 - Move fetch_planet into fetch_blog and import my blog posts into the planet section
- 5dd00305e7 - Drop planet.phpmyadmin.net

phpmyadmin/shapefile (GitHub)

Week 12

- 78225ea5cd - Set Scrutinizer to PHP 8.2.29 (they do not have .30) for psalm to install
- c4e095418a - Set Scrutinizer to PHP 8.2 and remove adding dbase as it breaks the install
- e9063651b9 - Set Scrutinizer to PHP 8.2.29 (they do not have .30)
- f81b04ee40 - Bump Scrutinizer to PHP 8.2.30
- 158de5b7bb - Update Scrutinizer comments to PHP 8.x
- e2feec1918 - Use Ubuntu bionic for PHP 7.2 on Scrutinizer

phpmyadmin-team/mariadb-mysql-kbs (GitLab)

Week 10

- 64bb41398a - d/ch
- 572a07c826 - Use phpunit --do-not-cache-result --no-coverage --fail-on-empty-test-suite
- 816dd331f6 - Bump d/copyright years

Week 13

- 06f43a2c57 - Send 1.3.0-4 to unstable

phpmyadmin-team/tcpdf (GitLab)

Week 10

- 3eea1f1ca2 - Send 6.11.2+dfsg-2 to unstable
- d46f111cc6 - Also close the Debian bug
- d97d65b156 - d/ch
- 304732db65 - Refresh the armhf_patch
- 7b6dfcfd99 - Import the patch from Ubuntu
- 7da3bece6f - Send 6.11.2+dfsg-1 to unstable
- 7818c84b8f - Bump d/copyright years
- e0edcee6ca - Bump Standards-Version to 4.7.3
- 52aa81580a - d/ch
- 0c62c92540 - Update upstream source from tag 'upstream/6.11.2+dfsg'
- 5b490762e1 - New upstream version 6.11.2+dfsg
- 56cea7fc28 - d/ch
- 2aafb8664f - Update upstream source from tag 'upstream/6.11.0+dfsg'
- 23c3e2a107 - New upstream version 6.11.0+dfsg
- ce96ad75c1 - Comment out Filename-Mangle for uscan to work (See: #1129464)

Handled issues

phpmyadmin/phpmyadmin (GitHub)

Week 10

- 16901 - Moving column to second place creates incorrect SQL
- 20195 - [Bug]: Error code: 200 when generating charts
- 15116 - Notice Undefined index: sql_insert_syntax
- 20140 - [6.0]: Uncaught TypeError: can't access property "error", data.responseJSON is undefined
- 19330 - Negative System Monitor chart values
- 18292 - Input fields styling in pmahomme theme
- 20174 - [Bug]: Cannot read properties of undefined (reading 'name')
- 20139 - [Bug]: Uncaught TypeError: can't access property "success", data is undefined
- 20142 - [Bug]: Uncaught TypeError: can't access property "trim", $form.find(...).val() is undefined
- 20141 - [Bug]: Uncaught TypeError: can't access property "debug", data is undefined

Week 11

- 20235 - [Bug]: composer install of web-auth/webauthn-lib fails
- 17451 - Rows count for table_uiprefs

Week 12

- 20182 - ShowDatabasesNavigationAsTree is not well documented
- 20121 - [6.0]: Columns are missing on Find and replace
- 20153 - [6.0]: ErrorException: foreach() argument must be of type array|object, null given, [5.2] ImportXml::doImport(): Node no longer exists
- 19891 - [Bug]: When `$cfg['Export']['format']`/`$cfg['Import']['format']` is invalid, 'sql' should be the default
- 20171 - [Bug]: Unknown system variable 'storage_engine' since MariaDB 12
- 20102 - [Bug]: Press escape to cancel editing not showing for truncated values
- 20134 - [Bug]: ErrorException: Undefined array key 0
- 20247 - CI for QA_5_2 has errors
- 20245 - [Feat]: Add configurable pre-query hook SQL executed before user-initiated queries

Week 13

- 20181 - [Bug]: Can't select text / column data

phpmyadmin/docker (GitHub)

Week 12

- 467 - Permission denied: access to / denied with overlayfs

phpmyadmin/website (GitHub)

Week 12

- 196 - https://planet.phpmyadmin.net/ 404

- 188 - Release notes not showing for 5.2.2
- 176 - My attempt to refresh the phpMyAdmin website
- 189 - TypeError: 'type' object is not subscriptable in files/models.py
- 135 - Book cover gone crazy
- 190 - Dark mode
- 191 - Daily snapshots not generated since 2025-07-18
