Consulting Services for phpMyAdmin

Report - July 2026

Overview

In July I merged and reviewed contributions, did some issues triage and kept up the Debian packaging of our dependencies.

First week (28)

I merged contributions after reviewing them. I also did some issues triage. I fixed compressed columns not being detected on MariaDB, a TypeError when adding a column without index data, and some test issues with PHPUnit 13.1. I updated the psalm baseline and worked on the release tooling (create-release.sh and the list of release excludes).

I also made twig-i18n-extension compatible with Twig 3.26+, and migrated the motranslator Debian watch file to version 5.

Fourth week (31)

I sent twig-i18n-extension 5.0.2-1 to unstable, bumped the Standards-Version and dropped the patches that are now upstream.

Commit list

phpmyadmin/phpmyadmin (GitHub)

Week 28

- c05036387a - Merge #20344 - Partially fixes #20332 - Fix compressed columns not detected in MariaDB
- d76fd63766 - Merge #20360 - Fix tests issues in PHPUnit 13.1
- 1a789d1c4d - Update the psalm baseline
- ddd5440ec3 - Merge #20367 - Fix #18304 - Avoid TypeError when adding a column without index data
- 331c8b15b8 - Merge #20371 - Update create-release.sh
- 2f98fcdcf0 - Merge #20370 - Update create-release.sh
- b89991087d - Add .codecov.yml to release excludes
- e2819fe195 - Exclude .phpstorm.meta.php from release tarballs
- 0a9362668c - Update the list of release excludes

phpmyadmin/twig-i18n-extension (GitHub)

Week 28

- 6b63be09de - Make expected compiled output Twig-version-aware for 3.26+
- 6d76c49cf8 - CI: disable fail-fast in the test matrix
- 695688405a - Fix TransNode unwrap for sandbox + auto-escape (Twig 3.26+)
- eb4ba0f136 - Revert "Disallow Twig >=3.26"

phpmyadmin-team/twig-i18n-extension (GitLab)

Week 31

- 9ced416f2e - Send 5.0.2-1 to unstable
- 2611f708a4 - Bump Standards-Version to 4.7.4
- 71c245e69b - d/ch
- ab1877822b - Drop patches that are now upstream
- 26aaaefd63 - Update upstream source from tag 'upstream/5.0.2'
- 87ab81293e - New upstream version 5.0.2

phpmyadmin-team/motranslator (GitLab)

Week 28

- 72b207a468 - Filter dev files from the git-generated orig
- 0fc3e00d82 - Migrate d/watch to version 5
